Education

J.C Bose University of Science and Technology, YMCA, Faridabad Graduation date: July. 2025
B.Tech(Computer Engineering) ***GPA: 7.96/10***

Relevant Courses: C++, Operating Systems, DBMS, OOPS, Algorithms and Data Structures, Python

Experience

Metric Vibes Feb 2025 - Present
Developer Intern *Php, Frontend Development, Python, Github*

- Worked as a Developer at Metric Vibes, specializing in PHP and MySQL to build secure, scalable
- Executed real-time organizational management systems with dashboards, reports, and role-based access.

CSIR - National Physical Laboratory, New Delhi June 2024 - Aug 2024
Junior Developer & Research Intern

- Contributed to the development of timing labs for LM Department and a disaster recovery center.
- Built a WebTime Display using Angular; analyzed WhiteRabbit time transfer technology.

Projects

Forward Slash Feb 2025
Forward Slash Info is a modern e-commerce for gadgets rental *HTML5, CSS, Javascript, PHP, PhpMy Admin, XAMPP*

- Developed a modern e-commerce platform using front-end technologies and PHP/MySQL for backend.
- Features: Gadget Rentals, License Provision System, and Dynamic Backend for auth, orders, and storage.

Advanced KeyLogger Jun 2024
Forward Slash Info is a modern e-commerce for gadgets rental *Python, Pycharm, Socket, SMTP*

- Keylogger software records all keystrokes, mouse clicks, and system events—often running silently in the background to monitor activity without user awareness.
- While it has legitimate uses like parental control or employee monitoring, it can also be misused for malicious purposes such as data theft, making unauthorized use illegal and unethical.
